Your Telephone Operat

ENGLISH

BEFORE 1st USE
Connecting your phone:
- Connect plugs in corresponding sockets in the base station. Plug the telephone line into telephone socket and insert power plug in an electrical outlet.
- Insert batteries in handset.
Before you start to use your telephone, charge the AAA batteries continuously for 15 hours.
⚠ Only use plug adapter supplied with the unit and rechargeable batteries with your phone.

Your Telephone Operations
Switching on / off
- Press and hold the ☎ key.
Notes: When the handset is OFF, it cannot be used for making calls including emergency calls. There will be no ringing during an incoming call.
To answer a call, you will need to switch it back on. It may take some time for the handset to re-establish a radio link with the base unit.

To lock / unlock the keypad
- Press and hold the ✱ key.
Note: Incoming calls can still be answered even if the keypad was locked.

Change the display language
- **OK** / ▲ (up) or ▼ (down) to select **HS SETTINGS** / **OK** / or to select **Language** / **OK** / ▲ (up) or ▼ (down) to your desired language / **OK** / confirmation beep.
Note: Once the display language is set, the option menus on the handset will switch to display in the selected language immediately.

Set time and date
Note: If you subscribe to the Caller Display service, the time and date will be set automatically when you receive a call, but you may still need to set the correct year.
- **MENU** / ▲ (up)or ▼ (down) to select **HS SETTINGS** / **OK** / ▲ (up) or ▼ (down) / **DATE & TIME** / **OK** / ▲ (up) or ▼ (down) to select **SET DATE** to enter the current (DD - MM - YY) / **OK** / ▲ (up) or ▼ (down) / **SET TIME** /enter the time (HH-MM) / **OK**.

Change your handset's name
- **MENU** / ▲ (up) or ▼ (down) to select **HS SETTINGS** / **OK** / ▲ (up) or ▼ (down) to select **RENAME HS** / **OK** to display the current handset name / ▲ to delete the characters / enter the new name (maximum 10 characters) / **OK** / confirmation beep.

Make and answer calls
Make a call
- ☎ either before or after dialing your number.
- From redial list: **REDIAL** / ▲ (up) or ▼ (down) / ☎.
- From call log list*: ▲ (up)or ▼ (down) / ☎.
Note: You need to subscribe to Caller Line Identification service to be able to see the caller's number or name in the call log.

Reset unit
- **MENU** / ▲ (up) or ▼ (down) to select **DEFAULT** / **OK**/ enter Master **PIN** / **OK** / **OK** confirmation beep.

Troubleshooting
If you have difficulty with your phone, please try the suggestions listed below.
As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.

Always check first that:	You have followed all the steps listed in the user manual to install and set up your telephone. All connectors are firmly inserted in their sockets. Mains power to the base unit is switched on at the socket. The handset's batteries are correctly and securely installed and are not run down.
Everyday use "I cannot make or answer calls"	If the handset's display is blank, it may have been switched off. Press and hold the HANG-UP/EXIT key to switch it back on. Check that the base unit's mains power adapter is plugged in and power is switched on. The base unit needs mains power for normal operation of the phone - not just for charging the batteries. Make sure you are using the telephone line cable supplied with your telephone. Other telephone line cables might not work. Move the handset closer to the base unit. Check the battery level symbol on the display. If it is low, replace the handset on the base unit or charger pod to recharge the batteries. Switch off power at the mains socket, wait for a short time and then switch back on. This may solve the problem.
"I cannot make a call"	If the handset display shows ⚿, press and hold the ✱ button to unlock it before you make a call. Only one handset (or the base unit) can be connected to the outside line at a time. If another handset is already using the line, you need to wait until it has finished its call.
"When I press on the keys, nothing happens"	Make sure the batteries are fitted in your handset. If the Battery Level symbol on the display shows 'low', put your handset back on the cradle to charge.
"When I key in a number, it appears on the display, but I cannot make an outside call"	Try a different position for the base unit —somewhere higher if possible, or further from other electrical equipment. Try moving the handset closer to the base unit.
"The phone does not ring"	Check that the base unit's mains power adapter is plugged in and power is switched on. Check that ring volume is not on OFF.
"I hear 'beeps' from my handset while I'm on a call"	You may be going out of range of the base unit. Move closer or your call may be cut off. Check the Battery Level symbol on the display. If it's low, recharge the batteries.
"The volume in the earpiece is low when I'm on a call"	Make sure you're holding the earpiece correctly over your ear. Adjust the volume using the UP/DOWN key.
Batteries "The handset's battery cells are running low within an hour or two"	Before you first use the handset, you should have left it on the base unit or charger pod for 15 hours to charge the batteries fully. You may need to replace the batteries. Check the connection between the base unit and the mains power socket unit.

"I try to recharge the batteries but I still get a warning that they are low"	You need to replace the batteries. Dispose of used batteries safely - never burn them, or put them where they could get punctured. Do not use non - rechargeable batteries in your handset - they may explode, causing damage.
If the fault persists...	Disconnect all other instruments connected to the same line and try to make a call. Disconnect the base unit from the telephone line and plug a different phone into the master telephone socket. Try making a call. If this works, the line is OK. If the call does not work, and you are using a two-way socket adapter, remove it and plug a telephone directly into the socket. If the call now works, the adapter may be faulty. If you cannot make a call, the fault may be on the exchange line. Contact the service provider.

The store where you bought your telephone can also provide you with information and after - sales support.

SAFETY
This telephone is not designed for Emergency calls when the main power fails.
Do not use your telephone to notify a gas leak or other potential explosion hazard!
Do not open your device or its power supply to avoid risk of electrical shock. Do not attempt to open the batteries, as they contain hazardous chemical substances.
Your telephone must be located in a dry place away from hot, humide and direct sunlight condition. To avoid radio signal interference, place the phone at least 1 meter away from other electrical appliances or other phones.

ENVIRONMENT
This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste.
Help us protect the environment in which we live!
